

# CYBER-COMPLIANT PHYSICAL SECURITY FOR GLOBAL TECH POWERHOUSE

## Business Need

A globally recognized leader in enterprise software and AI required a cyber-secure physical security architecture that aligns with international SLA and compliance requirements—delivered at scale across India.

## Solution Implemented

- End-to-End CCTV Surveillance with 4K Cameras
- Multi-Zone Fire Alarm Panels
- Access Control Ecosystem with Biometric Readers
- Boom Barriers, Flap Gates & Under Vehicle Scanners
- Baggage Scanners & Key Management Systems
- Enterprise-Grade PA Systems for Emergency Notification

## Enhanced Outcomes

Rollout of **1500+ Networked IP Cameras** and **42 Enterprise-Grade Servers** for archival and analytics

Installed **1100+ Access Readers** with **120+ Networked Controllers** for multi-tier access segmentation

**109+ Flap Barriers, 54+ Boom Barriers, and 4 Under Vehicle Scanners** covering entry/exit points

**Advanced Baggage Scanner** integration for secure asset and personnel movement

Comprehensive deployments across major metros with projects running PAN India

Partnered since 2012 with continuous scaling and compliance adherence
